584. Find Customer Referee

Solved

Easy

Topics

Companies

Hint

SQL Schema

Pandas Schema

Table: Customer

| Column Name | Type    |
|-------------|---------|
| id          | int     |
| name        | varchar |
| referee_id  | int     |

In SQL, id is the primary key column for this table. Each row of this table indicates the id of a customer, their name, and the id of the customer who referred them.

Find the names of the customer that are **not referred by** the customer with id = 2.

Return the result table in **any order**.
