Solutions

Submissions

Write a solution to find the percentage of the users registered in each contest rounded to **two decimals**.

Return the result table ordered by `percentage` in **descending order**. In case of a tie, order it by `contest_id` in **ascending order**.

The result format is in the following example.

Example 1:

Input:

Users table:

user_id	user_name
6	Alice
2	Bob
7	Alex

Register table:

contest_id	user_id
6	6
6	2
6	7
2	6
2	2
2	7
7	6
7	2
7	7
